☎ (226) 505-7658 ✉ g2iyer@uwaterloo.ca  [linkedin.com/in/g-iyer](https://www.linkedin.com/in/g-iyer)  github.com/guhansiyer

SKILLS

Languages: C, C++, Java, Python, Scala, VHDL, Verilog, ARM Assembly

Libraries: FreeRTOS, Django

Tools & Technologies: Git, CMake, Makefile, I²C, UART, SPI, TCP/IP, Intel Quartus Prime

EXPERIENCE

Incoming Research Assistant

Sept. 2024 – Dec. 2024

University of Waterloo

Waterloo, ON

- Developing a **Scala**-based **Verilog** synthesizer for cryptographic hardware applications.

Systems Software Engineering Intern

May 2024 – Aug. 2024

NCR Voyix

Waterloo, ON

- Designed and maintained various systems to support critical engineering infrastructure.
- Created an internal tool with **Django** to verify patch compliance information for over **10000** devices.
- Refactored **Python** scripts to periodically update internal documents with correct user information.

Firmware Developer

July 2023 – Present

UW Orbital — University of Waterloo Satellite Design Team

Waterloo, ON

- Developed a thermal monitoring system and essential functions for command & data handling.
- Leveraged **FreeRTOS** to develop an event handler for fatal over-temperature shutdowns.
- Integrated interrupt service logging and stack overflow handling, improving system resiliency.

Electrical and Telemetry Lead

Sept. 2022 – June 2023

Laurel Heights Secondary School Electric Vehicle Club

Waterloo, ON

- Designed, assembled, and maintained the electrical systems of student-built electric vehicles.
- Implemented a telemetry system by interfacing a radio frequency module with **Arduino**.
- Competed in the Waterloo Electric Vehicle Challenge, placing **1st** in the 24-volt category.

PROJECTS

Maze Solving Firefighter Robot | BASIC, PIC Microcontrollers

Sept. 2022 – Jan. 2023

- Built a robot to solve complex mazes in which it must locate and extinguish a lit candle.
- Developed an embedded system to manage sensor readings and allow for autonomous operation.
- Calibrated robot to be capable of **sub-five second** solves in standard competition mazes.

Neural Circuit Cellular Automaton | Java, Processing, Git

Oct. 2022

- Created a cellular automaton that simulates the formation and operation of a biological neural network.
- Designed and documented a finite state machine and path-finding algorithm.
- Implemented ruleset with **Java**, visual output with **Processing**.

EDUCATION

University of Waterloo

Waterloo, ON

Candidate for Bachelor of Applied Science in Computer Engineering

Sept. 2023 – Present

- Relevant Coursework: Algorithms & Data Structures (C++), Digital Computers (ARM Assembly)
